

JMA METADATA MONITORING FOR GTS BULLETINS

JMA has launched a metadata monitoring site to assist National Centres in finding out gaps between WIS metadata records and GTS bulletins that are exchanged over GTS. The monitoring, located at <http://www.wis-jma.go.jp/cms/monitoring/> and updated every day, gives a list of GTS headings that lack corresponding metadata records. This monitoring is intended to be used with the Excel based metadata creation tool.

Each National Centre user of GISC Tokyo's metadata management service has its own monitoring results page with a time line showing numbers of WIS metadata records and a list of GTS headings without WIS metadata. Users are expected to create metadata records for these headings and upload them to WIS Catalogue.

Comparison of Automatic Catalog and WIS Metadata

Center: VGDC (Dacca, Bangladesh)

GTS headings lacking WIS Metadata

	GTS headings
1	ISCC01
2	ISMC20

This monitoring also provides a whole list of location indicators (CCCC) with headings lacking WIS metadata records to assist other centers.
